

Satheesh

- *The smart protection system defines that this project help to farmer for the protection of a farm
- *Used to indicate the farmer by using sensor
- *Using automatic light control
- *Alert fencing system using GSM

Selva Mahalakshmi

- *Sensors to detect if there is any disease
- *Realtime crop monitoring
- *Effective accuration and adaptive
- *Improved livestock farming

Idea Brainstorming

BADULLA BABA

- *Ultrasonic sensors are used to detect the animal movement
- *Alarm to scare the small predator like birds
- *Reduce the environmental footprints
- *Send intimation message to user where there is any movement of animals activities

FOUZIA TASNEEM

- *Necessary communication interface
- *Highly flexible and more accuration
- *Sensors to detect the any movements of the animals
- *Local data acquisition
